

► **Shape your future with us!**
Work in the high-growth industry of renewable energies.

The wpd-group with its more than 670 employees around the world is actively taking part in shaping the change to renewable energies. We have become market leader within Germany by specializing in planning, financing, implementation and operating of wind parks. Furthermore, we are actively planning wind parks in more than 20 countries.

With respect to our increased business efforts in Poland we are looking for a

PROJECT MANAGER (m/f)

Your responsibilities

- Technical planning and development of our wind farms up to a ready-to-build status
- Follow up our projects in the different administrative procedures (master plan, environmental studies, building permit procedure, e. g.)
- Supervision of suppliers, consultants and public authorities

Requirements

- Minimum 3 years of working experience, preferably with renewables
- Experience in the energy sector or in project development
- Engineering degree
- Advanced written and oral English skills
- You identify yourself with renewable energies
- Availability and willingness to spend 2-3 days a week traveling
- Good IT skills

We are offering:

- A responsible position in a dynamic company with great perspective for the future
- Cooperation in international team with excellent personal growth and development opportunities
- A possibility for integration in a young and friendly team of co-workers
- Great support of experience and knowledge in wind sector

Please include with your application a CV (with photo) and a motivation letter stating expected salary and motivations.

Only applications in English will be considered.

Please send your application to: info@wpd-polska.pl

A large, stylized graphic of a wind turbine is positioned behind the word 'WIND'. The turbine's blades are represented by several thin, white, curved lines that sweep across the top of the image. The word 'WIND' is written in large, bold, white, uppercase letters with a slight shadow effect, set against a background of a satellite-style map of Europe and the surrounding seas. A grey arrowhead points to the right, partially overlapping the end of the word 'WIND' and the turbine's blades.
